

REGA BEVELS

the definitive collection 2005 edition

an
ocean
of choice

fanlight bevels ♦ door bevels ♦ designer bevels ♦ jewels

£3.50 €5.00 \$5.00

the best ever

choice of creative options
for decorative glass

RegaBevels are part of a range of decorative glass overlay products offered by RegaLead. When used in conjunction with RegaLead lead profiles and RegaFilm Stained Glass Art Films the results can be stunning - art glass creations of the highest quality. With our overlay system, all products are designed to be applied to a single surface of glass (or plastic) to create dazzling leaded panels. Our ever-expanding range of products has been inspiring the Glass &

Glazing industry for many years, adding individual style, colour appeal and value to property. All Regabevels are precision made from 5mm float glass that bevels down to a 1.8mm edge so they fit precisely with RegaLead lead profiles.

Regalead pioneered the art of bevelled glass design in the UK, and this, the 2005 Collection brochure, contains over 100 new bevels that include Alphabet, World, Wildlife, Door and Fanlight designs:

- **Clear bevels** - more than 480 in this year's collection
- **Coloured bevels** - pale blue, green and bronze colour options that change in density when viewed from different angles, adding a real touch of class to any project
- **Glue chip bevels** - the surface of the bevel is textured and the bevelled edges are clear giving a sparkling visual effect. These bevels offer almost total obscurity making them ideal for use in door panels and other applications where privacy is important to your client
- **Multi-faceted and double-faceted bevels** - these feature bevels add extra prisms to the light refraction and glitter more than the standard bevel edges
- **Concave bevels** - featuring a new technique in which a concave 'dish' is taken out of the bevel's surface creating extra brilliance and further levels of privacy
- **Seamed bevels** - suitable to use without lead profiles, the edges of these bevels have been repolished to remove rough cut marks (that would normally be covered by the lead profile) and are marked as 'seamed' throughout this brochure.
- **Bespoke bevels** - we're convinced that what we have created with this edition of our 'definitive' bevels collection will stimulate and inspire you, but if you have an idea of your own that you would like to turn into reality, we can now offer a Custom Beveling service which is detailed at the back of the brochure.

uv-tek

for the scientific application of bevels

RegaLead was instrumental in the development of the UV-TEK system, now acknowledged as the most advanced and successful method of bonding bevels to glass surfaces.

The UV-TEK system is based around an ultra-fast-cure UV adhesive with a unique formula and is supported by a CE-approved lightbox curing unit with bespoke templates and accessories. Combined these ensure an accurate, rock-solid and permanent bond in just 30 seconds.

The system has been weather and time tested both here in the UK and in Australia where UV-TEK cure bonded bevel assemblies withstood more than 1,000 hours with zero failures, when tested to ASTM-G53-94 standards.

The UV-TEK system is recognised as THE method for bevel application. RegaLead offers personal training for customers and a training video is also available as part of the package

marketing support

For further details of these and other marketing support material please contact RegaLead Marketing on 0161 946 1164

To help customers market the RegaBevel range we offer a suite of marketing aids including colour brochures and design software.

Our 'Distinctive Door Panels' and 'Creative Options for Fanlights' brochures are packed with photographed design ideas using RegaBevels in conjunction with RegaLead profiles and RegaFilm Stained Glass Art Films. We also offer customised overprinting on our existing brochures for users who need a more personalised marketing package.

To help with the design of decorative glass panels using our ranges of bevels and coloured films we offer a customised software solution. GlassEye 2000R is a CAD drawing package specially developed for designing overlay and traditional stained glass. It comes preloaded with all our bevel designs, film colours and brochure designs so users can either just change the design size and print or design custom panels from scratch. We offer a free 30 day limited features trial on this software and also offer training at either your premises or in our own studio.

GLUE CHIP BEVELS

RegaLead glue chip finish is created by employing the authentic age-old traditional technique of applying a strong glue coating to the surface of the glass and then removing it to leave the distinctive textured appearance.

THE DESIGNER COLLECTION

ALL DESIGNER COLLECTION BEVELS ARE SEAMED

Now a firmly established favourite with decorative glass studios, the RegaLead Designer Collection is a simple, yet innovative concept for creating imaginative bevel designs for windows, doors and fanlights. Using just the 19 basic bevel shapes illustrated below, and the full-size positional templates that are also available, you can assemble them into an almost infinite number of combinations enabling you to create a virtually endless range of attractive designs.

Note: All bevels in the Designer Collection are supplied in packs of ten.

THE INSPIRATION FOR INNOVATION

Turn over the page to see a superb selection of designs achieved by using just the 19 basic shapes above. Each design is also accompanied by a 'Shopping List' which identifies the bevels required for its assembly.

GET EVEN MORE FROM THE DESIGNER COLLECTION

The 'BevelDine' Book available from RegaLead, has 58 pages illustrating a huge library of multi-bevel designs all of which can be achieved using the 19 Designer Collection bevels. Each featured design includes a comprehensive list of the bevels required, plus finished production dimensions. *To obtain a copy of the BevelDine book, contact RegaLead sales office.*

Glass jewels are hand made therefore slight variation in colour and small "seeds" can occur.

CUSTOM BEVELLING

RegaLead's custom beveling service has been introduced to create more design options for window, door, conservatory and other decorative glass suppliers. Designs are no longer restricted by size, colour or design of bevels currently available in the marketplace. Now customers can design their own bevels, have a logo made in bevelled glass, change the size or colour of any of the RegaBevels range currently available or have a bevel designed for a project.

Ideal for any bevelled window or door suppliers from small studios to large contractors, any quantity of custom bevels can be supplied from one to thousands. Prices are based on the size and complexity of design and each design is quoted individually.

Discover how the brilliance and beauty of hand crafted custom bevels can add an extra dimension to your designs.

Colours & Textures

Custom bevels are currently available in the following colours and textures:

Bevelled Edges

Glass is 5mm thick.

Edge thicknesses available are:

Standard Edge - for overlay
- between 1.5mm and 1.8mm thick

Thick Edge - for traditional stained glass
using lead came - approx 2.5mm thick

Seamed Edge - highly polished for use
without any lead around the edge

Ordering a Custom Bevel

Send a sketch or design idea, with dimensions and quantity required. We will produce a quotation. If the quotation is acceptable we will produce the design template (if required) and order a sample bevel for you.

Pricing

Prices are based on:

- A design fee for the template, charged only once per design
- A set-up charge, charged only once per design
- The cost of the beveling and the glass

The larger quantity you order the more cost effective it is.
